

GasLine

- GasLine non-standard customization
- Individual or batch custom welding of conventional and special-shaped GasLine.
- Welding materials are well-known brands in the industry, designated brands can also be used.

GasBOX

GasBOX is a key subsystem of process equipment for conveying ultra-high purity gases/chemical media. According to the schematic diagram, Using 3D modeling technology, a 1:1 simulation prefabrication can be created, providing both appearance and internal pipeline design, as well as recommendations for internal component selection.

customization is carried out according to the actual drawing.
